

## Professionals on your side!

The sales and marketing team of CZECH INTERNATIONAL, a.s. provides its customers with high-quality services using state-of-the-art technologies. We continuously work on the possibilities of providing such services and solutions that, at a particular moment, solve client requirements to the widest possible extent. Our clients can thus use the facilities of a strong forwarding agency with the link to worldwide operators.

## What do we offer?

The requirements of our customers are handled by qualified specialists with long-term experience in the field of logistic, forwarding and customs services.

### ■ Road transport:

### ■ Working out projects for logistic and customs services:

- For import and export of goods
- Investment units of any value

### ■ Management of logistic and distribution centres:

- At the customer's site
- In the Logistic Terminal Prague-Nupaky

## Road truck transport

We have a wide network of contractual carriers operating across Europe. For road transport we use the most suitable goods vehicles – from vans through 25-tonne truck sets to vehicles with a large loading space of JUMBO type and special semi-trailers for over-dimensional loads.

Owing to our long-term contracts based on CMR convention, we acquire very reasonable relations of prices.

CZECH INTERNATIONAL, a.s. works on the basis of our **"General Forwarding Conditions"** published on the website at [www.czechint.cz](http://www.czechint.cz).

## Logistic projects

When implementing projects of multimodal logistic chains, we cooperate with haulage companies with worldwide operation owning their own fleets of vehicles, ships and aircraft. We maintain contacts with customs and harbour agents in both Europe and overseas. Both Czech and foreign customers appreciate it that at their trade negotiations they can offer the **delivery term DDP** – delivered duty paid, with completion of all customs and import formalities, to any destination in the world.

And they can only be sure that their shipments will be transported in the technically and economically most advantageous way and route.

## Collection service for individual shipments

We provide the transport of shipments using our collection service within the Czech Republic, Slovakia and some other European countries. Our speciality is, for example, collection service to/from Greece.

Upon request, we also provide **express shipments** within the Czech Republic and to neighbouring countries.

## Logistic Terminal Prague-Nupaky

The main centre of comprehensive forwarding, storage and customs services that we use is the **Logistic Terminal D1 Zone** of Nupaky Logistic Park, s.r.o. based at Nupaky 148, 251 01 Říčany u Prahy.

The terminal is part of the business-industrial centre at the 10th km of D1 motorway in the Brno-Prague direction and it is the head office of Customs Office Prague D1. It enables importers and suppliers to create integrated logistic chains in import and distribution of goods.

## Representation abroad

In Slovakia, logistic and customs services of the same extent are provided by our subsidiary SLOVAK INTERCARGO s.r.o.
